Github: [KA18202005](#)

Linkedin: [kavya-agarwal-8939a8312](#)

Leetcode: [KavyaAgarwal18](#)

- Computer Science undergraduate at IIIT Bhubaneswar with strong foundations in Data Structures & Algorithms, Full-Stack Development, and Machine Learning. Solved 1000+ DSA problems and achieved a 2000+ LeetCode Contest Rating. Passionate about building AI-powered applications using LangChain, LangGraph, and modern web technologies.

EDUCATION

International Institute of Information Technology (IIIT) Bhubaneswar

B.Tech in Computer Science Engineering.

Batch: 2024 – 2028

CGPA: 8.55/10

Renaissance School, Bulandshahr, U.P.

Senior Secondary (PCM) – 96%

Matriculation – 93.8%

ACHIEVEMENTS

- Achieved 2000+ LeetCode Contest Rating.
- Solved 1000+ DSA problems across LeetCode, GeeksforGeeks, and other coding platforms.
- Strong problem-solving skills in Dynamic Programming, Graphs, Trees, Binary Search, and Greedy Algorithms.

SKILLS

Programming Languages: C++, Python, JavaScript, C

Web Development: React.js, Next.js, Tailwind CSS, HTML, CSS, Flask, FastAPI, Streamlit

Generative AI: LangChain, LangGraph, Agentic AI, Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents, MCP, LLM Application Development

Machine Learning: Scikit-learn, PyTorch, NLP, Deep Learning

Databases: MongoDB, MySQL, ChromaDB, FAISS

Tools & Platforms: Git, GitHub, Docker, n8n, Ollama, Hugging Face, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Database Management Systems

PROJECTS

LangGraph Blog Writing Agent | LangGraph, LangChain, Gemini, Tavily, Streamlit | [GitHub](#)

- Developed a multi-agent AI content generation system using LangGraph and LangChain to automate blog planning, research, content creation, and refinement workflows.
- Integrated Gemini and Tavily Search API to generate research-backed articles with real-time information retrieval and context-aware content generation.
- Built a Streamlit frontend and Python backend supporting end-to-end blog generation, image-assisted content creation, and agent orchestration.

Expense Tracker MCP Server | Python, FastMCP, SQLite, MCP | [GitHub](#)

- Developed a remote MCP (Model Context Protocol) server exposing expense management and financial analytics tools for AI assistants through a standardized tool interface.
- Implemented expense tracking operations including expense creation, income management, updates, deletion, category-wise summaries, and date-range based querying using SQLite and aiosqlite.
- Built an HTTP-based MCP service with streamable transport, enabling integration with MCP-compatible clients such as Claude and custom AI agent workflows.

Get Me a Chai | Next.js, MongoDB, Razorpay, NextAuth.js | [GitHub](#)

- Developed a full-stack crowdfunding platform inspired by Patreon, enabling creators to receive support through secure online payments and personalized creator pages.
- Integrated Razorpay payment gateway and OAuth-based authentication using NextAuth.js, supporting seamless user onboarding and secure transactions.
- Built dynamic creator dashboards with MongoDB-backed data management, allowing users to track supporters, manage profiles, and monitor contributions in real time.

AI Resume Expert | Streamlit, PyMuPDF, Python, LLMs | [GitHub](#)

- Developed an AI-powered resume analysis platform that evaluates resume quality, ATS compatibility, skill gaps, and job-role alignment using Google Gemini.
- Implemented ATS scoring, resume improvement suggestions, interview question generation, professional summary creation, and cover letter generation from uploaded resumes.
- Built an interactive Streamlit application with PDF processing using PyMuPDF and deployed it on Streamlit Cloud for real-time resume optimization.
